Work Experience

ENMAX Corporation

Digital Experience Co-Op Student

Calgary, Canada

January 2023 - Present

- Schedule meetings with the team to keep the IT Recognition Portal project on track, gather requirements, develop changes, work with UX for best design, develop testing strategy, and work with extended IT team for organizational change management practices.
- Compile information from DevOps tickets and create release notes document. Review and vet notes with team and management before completion. Attend releases to document updates and redesign release notes document for a more modern look.
- Gathering requirements by participating in meetings with assigned developers/UX designers, documenting discussions, and making recommendations for templates.
- Attend requirements sessions with assigned developer and/or UX designer, document discussions and make recommendations for template improvements.
- Make small UX edits and changes to enmax.com, edit SharePoint backend and push through production, work with testing to ensure completion before launch.
